

PROFINET on Your Embedded System

Custom Integration of PROFINET With TSN Compatibility

The fastest way to bring PROFINET to your Embedded System!

- ✓ **From zero to hero:**
We manage the whole PROFINET integration to your device
- ✓ **Cortex-A, Cortex-R, MPSoCs, ...:**
Processor of your choice
- ✓ **Reduce costs & time:**
No knowledge of a PROFINET SDK is needed

You want PROFINET? You get PROFINET!

The Easiest Way to Get Started With PROFINET

PROFINET is the de facto standard communication protocol for modern automation processes. Whether you're launching a new project or upgrading your hardware, we deliver PROFINET solutions **tailored to your needs**, ensuring your systems are always at the cutting edge.

Tailored to Your device

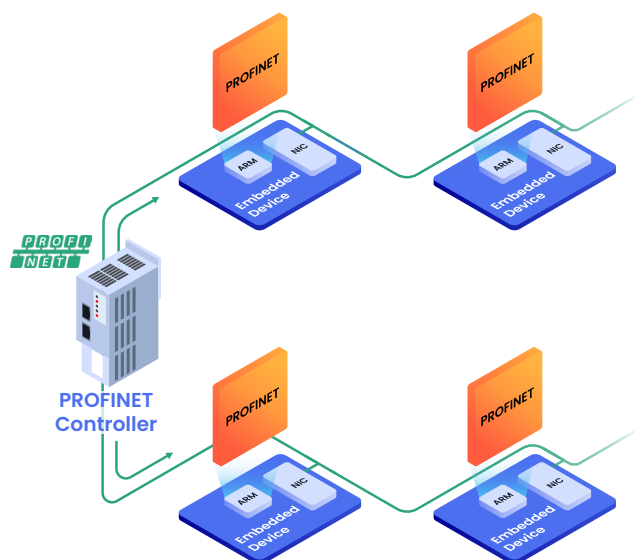

No matter your embedded system, we provide PROFINET solutions that fit perfectly. From **Cortex-A** to **Cortex-R**, **MPSoCs**, **ARM**, and more — you name it, you get it. Plus, our PROFINET support is **independent of any specific SDK**, giving you complete flexibility.

Made for the Future

We provide **long-term support** to keep your systems running smoothly. Need **Time-Sensitive Networking (TSN) features**? We can seamlessly integrate them, ensuring your PROFINET setup is always ready for what's next.

What You Can Expect:

- PROFINET on your device
- Long-term support
- Flexible solutions
- PROFINET SDK independence
- Future-proof technology
- TSN compatibility
- Hardware independence
- Seamless integration
